EDUCATION

MASSACHUSETTS INSTITUTE OF TECHNOLOGY, SLOAN SCHOOL OF MANAGEMENT Cambridge, MA
Candidate for Master of Business Analytics, Operations Research Center, August 2026; GPA: 5.0/5.0 2025 – Present

- Coursework: Machine Learning, Optimization Methods, Financial Engineering, Deep Learning, Product Analytics
- Machine Learning Project: Designed an optimized schedule in Julia to prescribe battery charging, holding, and selling strategies for electricity storage using predicted solar energy and next-day market pricing, increasing profits by 20%
- Optimization Project: Engineered scalable optimization pipelines in Julia to identify high-impact locations for new wells in the Democratic Republic of Congo that maximize reach and minimize distance, improving access to water by 19%
- Activities: Impact Investing Club, Sloan Pride Leadership Board (Social VP), MIT Triathlon Club

UNIVERSITY OF CALIFORNIA, BERKELEY Berkeley, CA
B.A. in Data Science (Emphasis in Applied Math & Modeling); Minor in Sustainable Design; GPA: 3.9/4.0 2021 – 2025

- Coursework: Data Engineering, Data Structures, Nonlinear and Discrete Optimization, Statistical Machine Learning
- Optimization Project: Rescheduled F1 races in AMPL to minimize travel distance and maintain venue requirements to reduce travel costs and improve sustainability by cutting average emissions by 927 tons of carbon dioxide per team
- Activities: Cal Triathlon Club (Treasurer, Athlete), Part-time data science researcher on voltage discharge predictions

TECHNICAL SKILLS

- Python, SQL, R, Tableau, Julia, AMPL, JuMP, Keras, Scikit-learn, PyTorch, Pandas, MATLAB, Excel, ArcGIS, Git, Azure

EXPERIENCE

MIT SLOAN / CONAGRA BRANDS Chicago, IL
Data Science Capstone Intern Spring 2026 – Present

- Building a production line scheduling tool that enables plant managers to minimize equipment downtime and changeover costs, while establishing a scalable blueprint for company-wide data standardization using Databricks, SAP, and Power BI
- Integrating an agentic AI solution for responding to unexpected events, enabling real-time schedule adjustments

MIT SLOAN / BOSTON PUBLIC HEALTH COMMISSION Cambridge, MA
Machine Learning Project Lead – Analytics Lab Fall 2025

- Deployed machine learning forecasting models in Python (Random Forest, Gradient Boosting, ARIMA) to forecast 14-day homeless shelter occupancy, integrating outputs in Streamlit and improving capacity planning accuracy by 50%
- Performed feature engineering and model interpretability analysis to identify key social, environmental, and temporal drivers of shelter utilization, allowing public health stakeholders to improve shelter resource allocation
- Selected for poster presentation at the 2026 CSTE Annual Conference (Boston, MA), demonstrating ML forecasting approach and capacity planning outcomes to 2,800+ public health professionals

VERDAGY Monterey, CA
Engineering company that designs alkaline electrolysis systems to create clean hydrogen Summer 2023, Summer 2024
Data Science Intern (Summer 2024)

- Developed and automated Python algorithms to take real-time raw sensor data and remove noise, outliers, and sensor malfunctions, reducing data cleaning labor by 80% and translating to more accurate summary statistics
- Designed and rolled out 9 dashboards using Python and Seeq software to detect voltage drift and hydrogen production for 10 lab-scale electrolyzers, enabling faster R&D decision-making for scientists and executives

Engineering Research Intern (Summer 2023)

- Constructed 7 lab-scale electrolyzers featuring custom Arduino-based boards for data collection, voltage sensors, and thorough automatic shutdown fail-safes, achieving over 1000 hours of operation per unit and industry-leading efficiencies
- Initiated and authored operating procedures, including wiring diagrams and piping designs, to enable efficient system replication across the 15-person lab team to minimize system variation error and lower learning curve

UNIVERSITY OF CALIFORNIA, BERKELEY Berkeley, CA
Data Science Teaching Assistant – Probability for Data Science 2024 – 2025

- Led and taught 2-hour discussion sections for 40 students covering advanced probability topics (Bayesian inference, Conditional expectation, Joint distributions, Regression, Markov chains)

ADDITIONAL INFORMATION

- Interests: Classical pianist (13 years), Endurance fitness (2024 San Francisco Marathon finisher, USA Collegiate Triathlon)
